PATOS

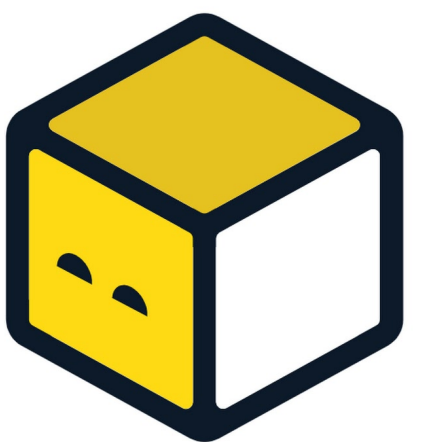

Pretty Awesome To Open Source

<https://patos.dev>

What is IaC?

- Manage Infrastructure with config files, not clunky UIs
- Repeatable
- Safe
- Collaboration
- **Declarative**

What is IaC?

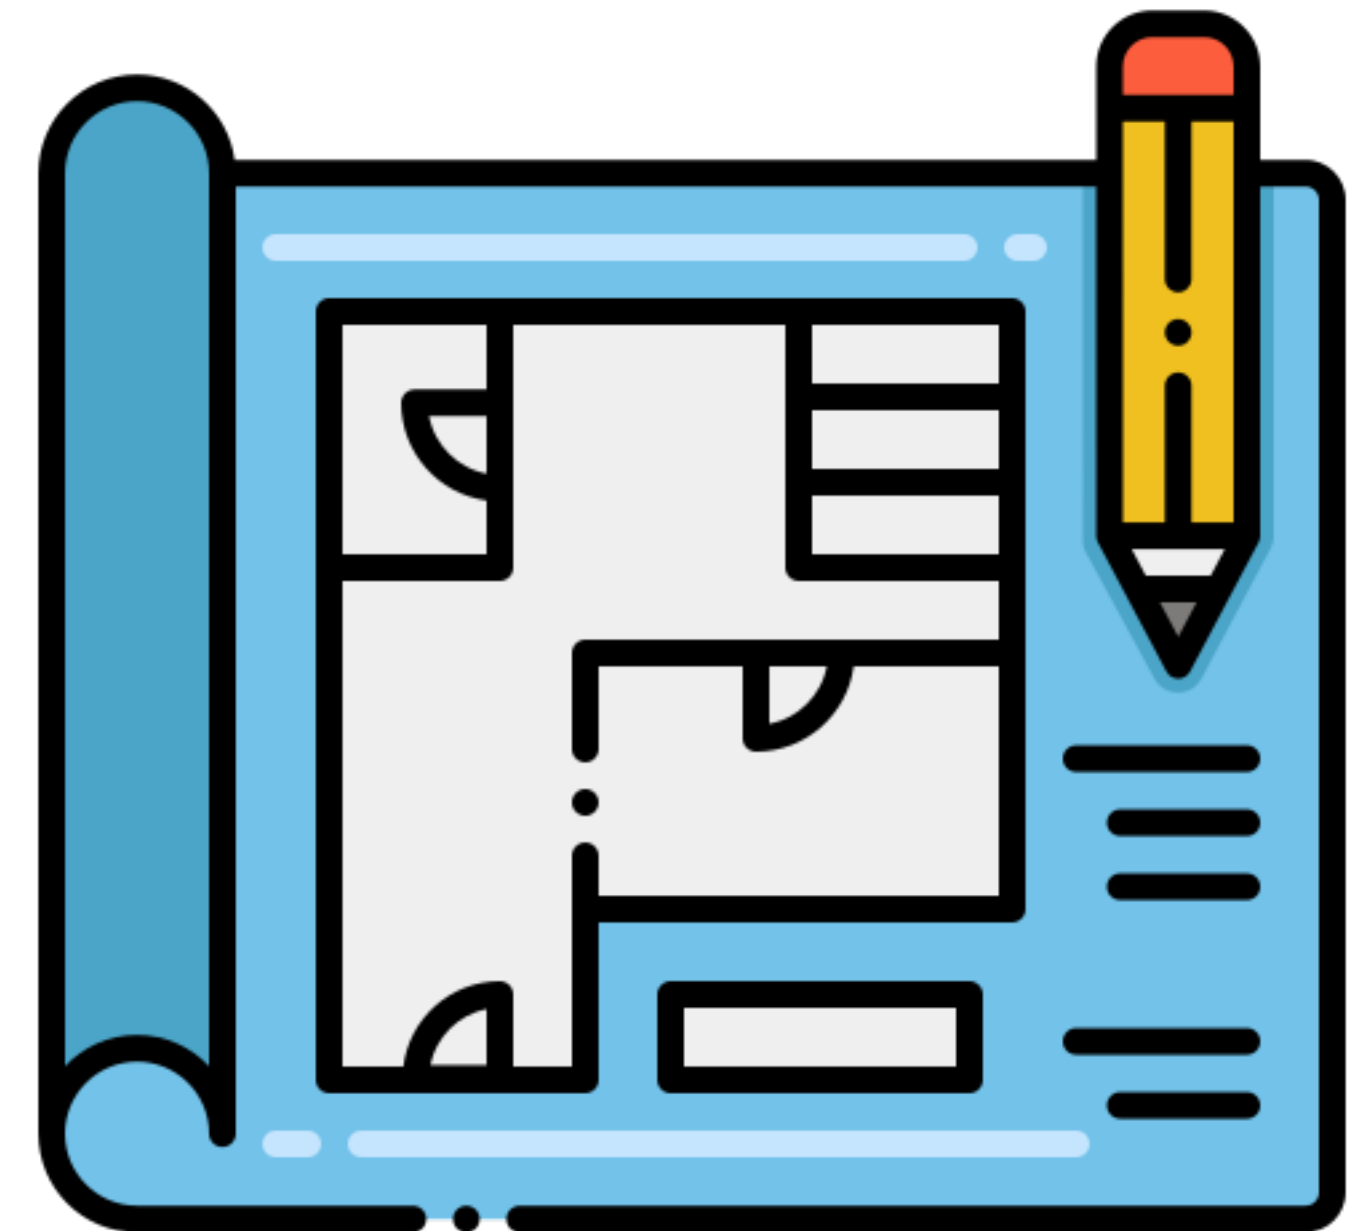

```
resource "mgc_virtual_machine_instances" "vm" {  
  name          = "clickhouse-spec-test-first-experiment"  
  machine_type  = "BV8-32-20"  
  image         = "cloud-ubuntu-22.04 LTS"  
}
```

What is IaC?

```
resource "mgc_virtual_machine_instances" "vm" {  
  name          = "clickhouse-spec-test-first-experiment"  
  machine_type  = "BV8-32-20"  
  image         = "cloud-ubuntu-22.04 LTS"  
}
```

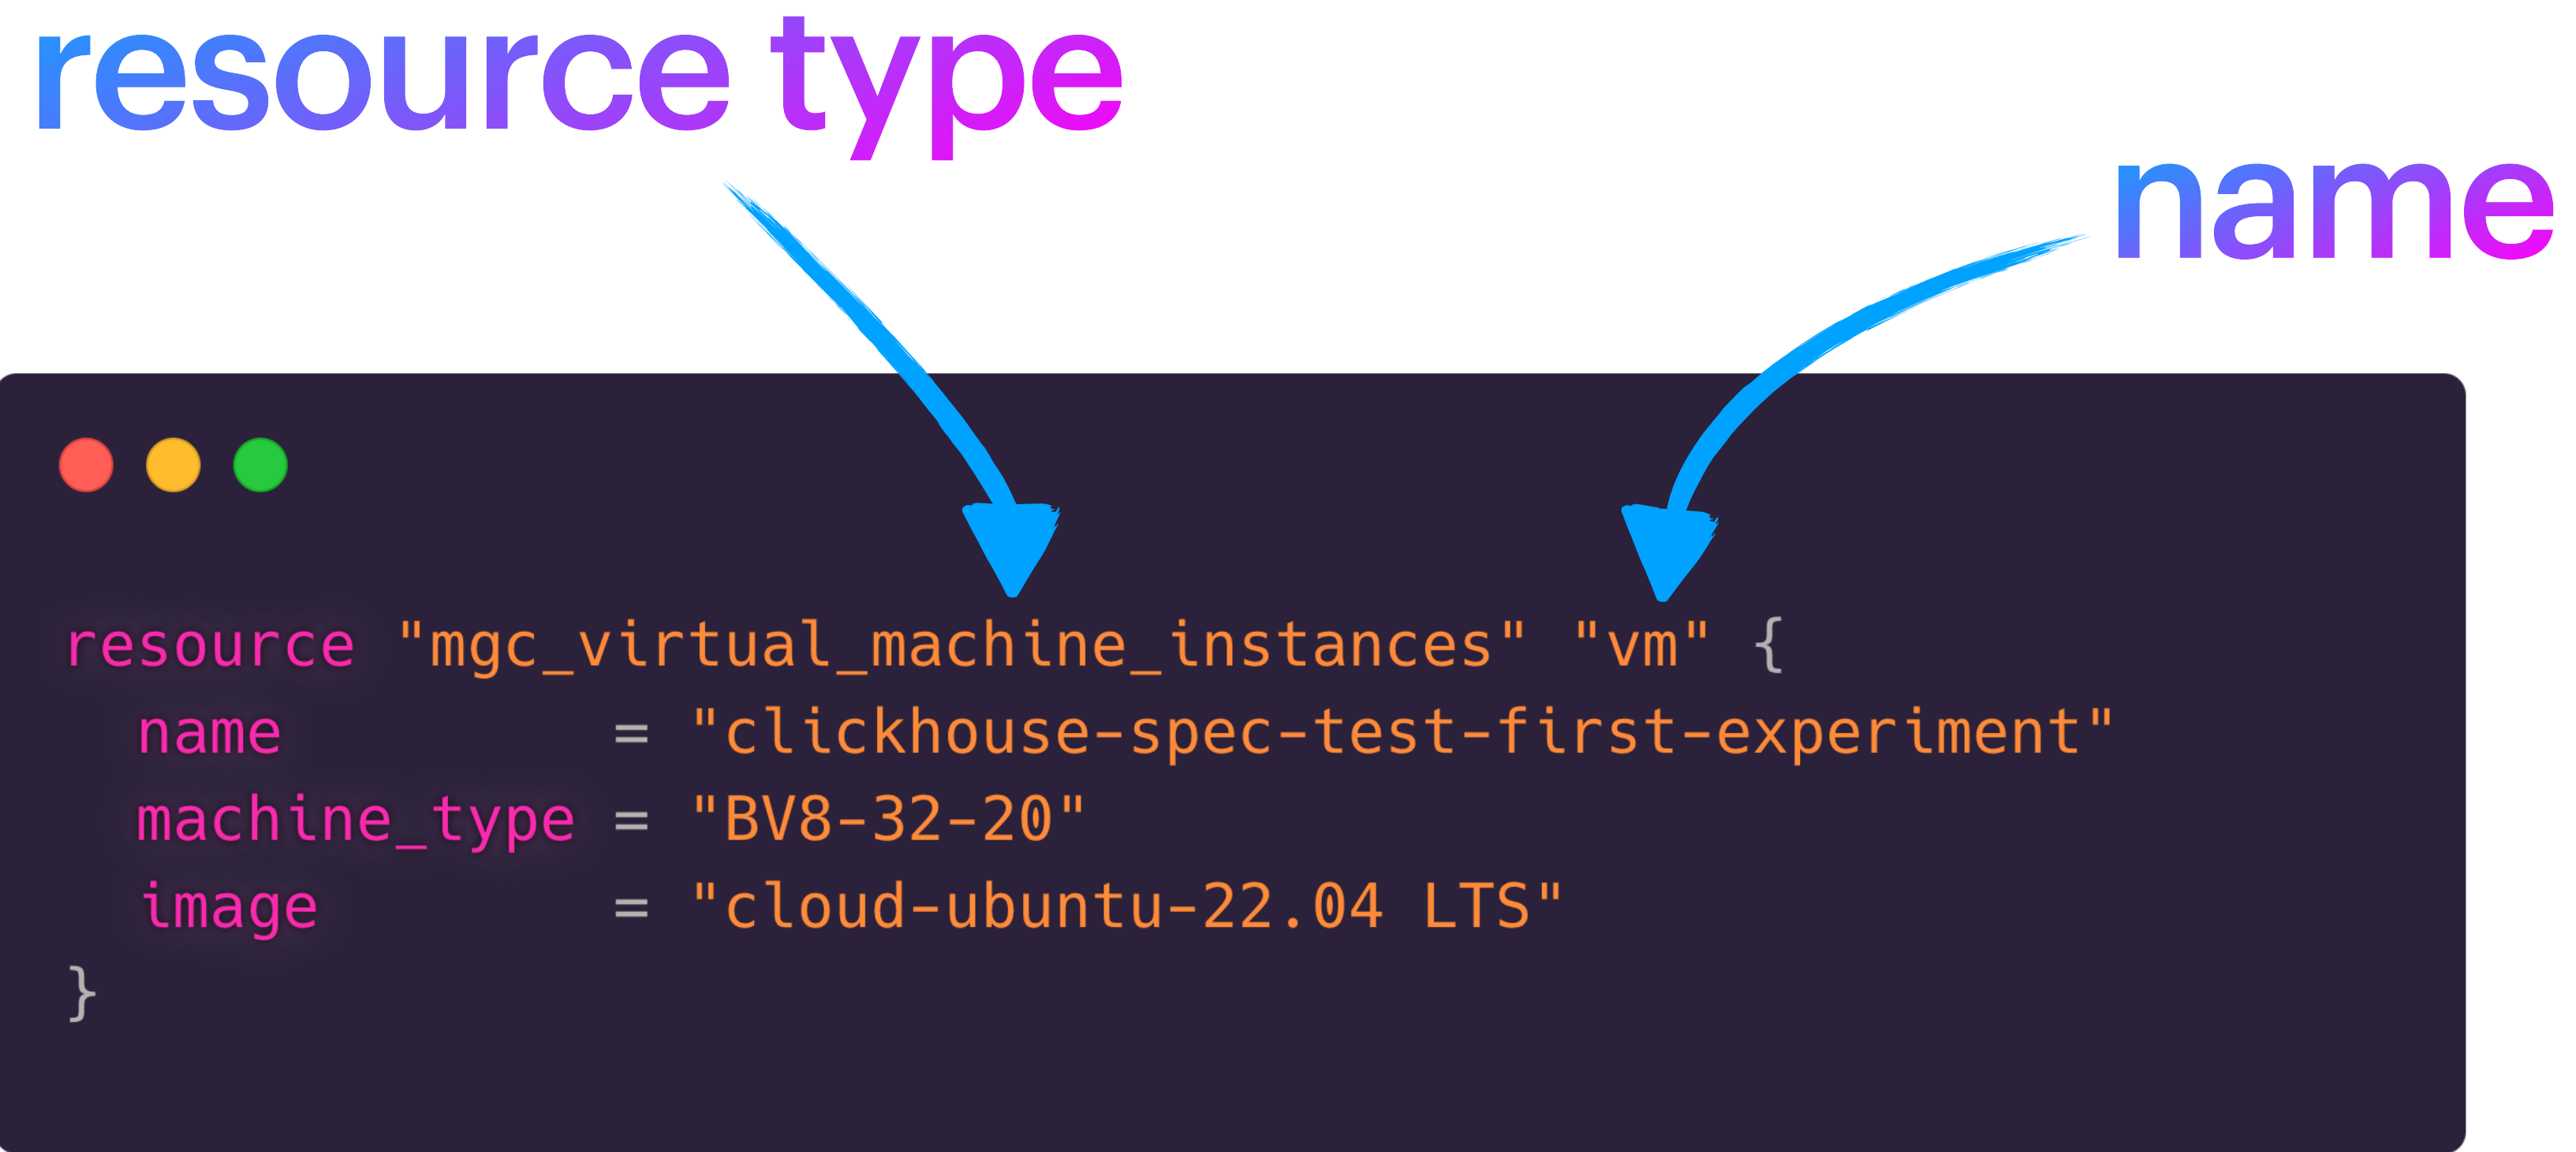

Declarative

.tf file

resource type

name

```
resource "mgc_virtual_machine_instances" "vm" {  
  name          = "clickhouse-spec-test-first-experiment"  
  machine_type  = "BV8-32-20"  
  image         = "cloud-ubuntu-22.04 LTS"  
}
```

.tf file

```
terraform {  
  required_providers {  
    mgc = {  
      source  = "magalucloud/mgc"  
      version = "0.33.0"  
    }  
  }  
}  
  
provider "mgc" {  
  region  = "br-se1"  
  api_key = var.api_key  
}
```

Terraform Providers

<https://registry.terraform.io/>

```
#!/bin/bash  
terraform init -upgrade  
terraform apply -var-file=cloudlabs.tfvars
```

Terraform Hands-On
